

TABLE OF CONTENTS

PREFACE	vi
LIST OF PARTICIPANTS	vii
SCIENTIFIC PROGRAM	ix
SESSION I: RECENT AND FUTURE DEVELOPMENTS IN THE REALIZATION OF THE ICRS	1
Ma C.: Steps towards the next radio realization of the ICRS	3
Petit G., McCarthy D. D.: Updating the IERS conventions to improve reference frames	8
Bolotin S.: Extension of the celestial reference frame	13
Souchay J., Gaume R.: Activities of the ICRS-PC of the IERS	16
Arias E.F., Bouquillon S.: Maintenance of the ICRS: stability of the axes by different sets of selected radio sources	19
Charlot P., Fey A. L., Jacobs C. S., Ma C., Sovers O. J., Baudry A.: Densification of the International Celestial Reference Frame: results of EVN+ observations	21
Yatskiv Ya., Bolotin S., Kur'yanova A.: GAOUA realizations of the Celestial Reference Frame	26
Bucciarelli B., Lattanzi M.G., Massone G., Poma A., Tang Z., Uras S.: Faint reference catalogues around ICRF radio sources from photographic observations	33
Camargo J.I.B., Daigne G., Ducourant C., Charlot P.: Precise near-IR astrometry and photometry of southern ICRF quasars	35
Fey A.L.: Improving the ICRF in the southern hemisphere	37
Sokolova J.R.: Influence of the early VLBI observations on the ICRF stability	39
Fukushima T., Capitaine N.: Summary of the discussion on the future organization of the ICRS activities within IAU Division I	41
SESSION II: MODELS FOR EARTH ROTATION: FROM POINCARÉ TO IAU 2000	43
Dehant V., de Viron O., Van Hoolst T.: Poincaré flow in the Earth's core	45
Capitaine N., Wallace P.T.: Improvements in the precession-nutation models	49
Hilton J.L.: Progress report of the International Astronomical Union Division I Working Group on precession and the ecliptic	55
Dehant V.: Introduction to kickoff meeting for the project "Descartes-Nutation"	61
Salstein D.A.: Plans for high accuracy computations of Earth rotation/polar motion excitations	64
Brzeziński A.: Nontidal oceanic excitation of diurnal and semidiurnal polar motion estimated from a barotropic ocean model	68
Escapa A., Getino J., Manuel Ferrándiz J. : On the effect of the redistribution tidal potential on the rotation of the non-rigid Earth: discrepancies and clarifications	70
Efroimsky M.: On the theory of canonical perturbations and its applications to Earth rotation: a source of inaccuracy in the calculation of angular velocity	74
Pashkevich V.V., Eroshkin G.I.: Spectral analysis of the numerical theory of the rigid Earth rotation	82
Huang C.-L., Dehant V., Liao X.-H., de Viron O., Hoolst T. V.: The coupling equations between the nutation and the geomagnetic field in GSH expansion	88
Chao B.F.: Formulation of the relation between Earth's rotational variation excitation and time-variable gravity	94

McCarthy D.D.: The free core nutation	101
V.E. Zharov: Model of the free core nutation for improvement of the Earth nutation series	106
Ron C., Capitaine N., Vondrák J.: Precession study based on the astrometric series and the combined astrometric catalogue EOC-2	110
Varga P., Gambis D., Bus Z., Bizouard Ch.: The relationship between the global seismicity and the rotation of the Earth?	115
Müller J., Kutterer H., Soffel M.: Earth rotation and global dynamic processes - joint research activities in Germany	121
Akulenko L.D., Kumakshev S.A., Markov YU.G.: A model and prediction of Earth's pole motion	126
Bădescu O., Popescu P., Popescu P.: A method for accuracy and efficiency's increase of geodetic-astronomical determination of the vertical's deviation	128
Bolotina O.V.: Implementation of new models for Earth rotation in data analysis at the Ukrainian Centre of determination of the EOP	130
Bourda G.: Earth rotation and variations of the gravity field, in the framework of the "Descartes-Nutation" Project	132
Coulot D., Berio P., Biancale R. et al.: Combination of space geodesy techniques for monitoring the kinematics of the Earth	134
Folgueira M., Capitaine N., Souchay J.: The equations of the Earth's rotation in the framework of the IAU 2000 resolutions	136
Koot L., de Viron O., Dehant V.: Atmospheric angular momentum time series: Characterization of their internal noise and creation of a combined series	138
Kosek W., Kalarus M., Johnson T.J., Wooden W.H., McCarthy D.D., Popiński W.: A comparison of UT1-UTC forecasts by different prediction techniques	140
Kudryavtsev S.M.: KSM03 harmonic development of the Earth tide-generating potential in Terrestrial Reference Frame	142
Lambert S.: Second order terms in the Earth's nutation	144
Nastula J., Kolaczek B.: Studies of regional atmospheric pressure excitation function of polar motion	146
Nastula J., Gambis D.: Excitation of polar motion by atmospheric and oceanic variabilities	148
Rambaux N., Van Hoolst T., Dehant V., Bois E.: Earth librations due to core-mantle couplings	150
Rogister Y., Rochester M.G.: 3D normal mode theory of a rotating Earth model using a Lagrangian perturbation of a spherical model of reference	152
Sidorenkov N.: The decade fluctuations of the Earth rotation velocity and of the secular polar motion	153
Stavinschi M., Mioc V.: Astronomical researches in Poincaré's and Romanian works	155
Zhang B., LI J.L., Wang G.L., Zhao M.: Solution of high frequency variations of ERP from VLBI observations	157
SESSION III: NOMENCLATURE IN FUNDAMENTAL ASTRONOMY	159
Capitaine N. et al: Report of the IAU Division 1 Working Group on "Nomenclature for fundamental astronomy" (NFA)	161
de Viron O., Dehant V.: 3D representation of the non-rotating origin	166
Hohenkerk C.: Implementation of the new nomenclature in the astronomical almanac	168
Wallace P.: Post-IAU-2000 nomenclature for the telescope pointing application	172
Soffel M.: Thoughts about astronomical reference systems and frames	178

Capitaine N.: Summary of the discussion on “Nomenclature in fundamental astronomy” during the Journées 2004	183
SESSION IV: ASTRONOMICAL REFERENCE SYSTEMS	189
Soffel M., Klioner S.: Relativity in the problems of Earth rotation and astronomical reference systems: status and prospects	191
Mignard F.: The GAIA reference frame : How to select the sources	196
Le Poncin-Lafitte C., Teyssandier P.: Influence of the multipole moments of a giant planet on the propagation of light : application to GAIA	204
Vondrák J., Ron C.: Combined astrometric catalogue EOC-2 - an improved reference frame for long-term Earth rotation studies	210
Chapront J., Francou G.: The lunar libration: Comparisons between various models - A model fitted to LLR observations	216
Fukushima T.: Efficient orbit integration by orbital longitude methods	222
Andrei A.H., Fienga A., Assafin M.: Véron & Véron based extragalactic reference frame	228
Damljanović G., Vondrák J.: Improved proper motions in declination of Hipparcos stars derived from observations of latitude	230
López J.A., Marco F.J., Martínez M.J.: A new method for dynamical analysis of orientation errors from non regular samples	232
Marco F.J., Martínez M.J., López J.A.: Infinitesimal variations in the reference and their implications on the minor planets elements and masses	234
Martínez M.J., Marco F.J., López J.A.: Two independent estimations for the ϵ_z values in the Hipparcos-FK5 catalogues	236
Pireaux C.: Relativistic modeling of the orbit of geodetic satellites equipped with accelerometers	238
Popescu R., Popescu P., Nedelcu A.: Astrometrical positions of NEO inferred from CCD observations at Bucharest	240
Yu Y., Tang Z.H., Li J.L., Zhao M.: A FORTRAN version implementation of block adjustment of CCD frames and its preliminary application	242
Zhu Z., Zhang H: Galactic warping motion from Hipparcos proper motions and radial velocities	244
SESSION V: FUTURE OF UTC: CONSEQUENCES IN ASTRONOMY	247
McCarthy D.D.: Future of UTC: consequences in astronomy: Report on the UTC Working Group and the latest developments	249
Arias E.F., Guinot B.: Coordinated Universal time UTC: Historical background and perspectives	254
Wooden W.H., Johnson T.J., Kammeyer P.C., Carter M.S., Myers A.E.: Determination and prediction of UT1 at the IERS rapid service/prediction center	260
Sôma M., Tanikawa K.: Variation of ΔT between AD 800 and AD 1200 derived from ancient solar eclipse records	265
McCarthy D. D.: Report on the group discussion on the future of UTC	267
POSTFACE	269
