

TABLE OF CONTENTS

PREFACE	vi
IN MEMORIAM	vii
LIST OF PARTICIPANTS	viii
SCIENTIFIC PROGRAM	x
LIST OF POSTERS	xiii
SESSION 1: THE ASTRONOMICAL CONSTANTS, SI UNITS AND FUTURE DEVELOPMENTS IN NUMERICAL STANDARDS	1
Luzum B., Capitaine N., Fienga A., Folkner W. et al.: Numerical standards of fundamental astronomy working group update	3
Petit G.: The new edition of the iers conventions: conventional reference systems and constants	6
Jacobson R. A. , Folkner W. M. , Taylor A. H. , Konopliv A. S. , Williams J. G. , Brozovic M. : Planetary system gms in the JPL planetary ephemerides	12
Hohenkerk C.Y.: SOFA—A status report, review and look to the future	16
Capitaine N., Guinot B., Klioner S.: Proposal for the re-definition of the astronomical unit of length through a fixed relation to the SI metre	20
Vondrák J., Capitaine N., Wallace P.: Some new thoughts about long-term precession formula	24
Débarbat S., Passeron I., Launay F.: From old weights and measures to the SI as a numerical standard for the world	28
Kudryavtsev S.M.: An inertial effect in satellite motion not described by the current IERS conventions	30
SESSION 2: SOLAR SYSTEM EPHEMERIDES AND THEIR COMPARISON	33
Kaplan G. H.: Introductory remarks for session 2	35
Fienga A., Manche H., Kuchynka P., Laskar J., Gastineau M.: Planetary and lunar ephemerides INPOP10A	37
Folkner W.M.: Uncertainties in the JPL planetary ephemeris	43
Pitjeva E.V., Bratseva O.A., Panfilov V.E.: EPM – Ephemerides of Planets and the Moon of IAA RAS: their model, accuracy, availability	49
Laskar J., Fienga A., Gastineau M., Manche H: INPOP, a million year ephemeris	55
Kudryavtsev S.M.: Development of long-term numerical ephemerides of telluric planets to analytical series	57
Krasinsky G.A., Prokhorenko S.O., Yagudina E.I.: New version of EPM-ERA Lunar theory . .	61
Manche H., Fienga A., Laskar J., Bouquillon S., Francou G., Gastineau M.: LLR residuals of INPOP10A and constraints on Post-Newtonian parameters	65
Dehant V., Oberst J., Nadalini, R.: Geodesy instrument package on the Moon for improving our knowledge of the Moon and the realization of reference frames	69
Pashkevich V.V., Eroshkin G.I.: Application of the spectral analysis methods for the investigation of the Moon rotation	73
Hilton J.L., Hohenkerk C.Y.: A comparison of the high accuracy planetary ephemerides DE421, EPM2008, and INPOP08	77
Barache C., Bouquillon S., Carlucci T., Deleflie F. et al.: Web interface for lunar laser ranging observations	81
Cottureau L.: A dynamical study of Phoebe’s rotation	83
Francou G., Simon J.-L.: New analytical planetary theories VSOP2010	85
Giorgini J.: Summary and status of the Horizons ephemeris system	87
Marco F.J., Martinez M.J., Lopez J.A.: Propagation in time of errors for the mutual inclination of satellites	88
Weratschnig J.M. , Taylor D.B., Bell S.A., Hilton J.L., A.T. Sinclair: Computation of the quantities describing Lunar librations in the Astronomical Almanac	90

SESSION 3: PROGRESS IN ASTROMETRIC CATALOGS IN OPTICAL AND RADIO WAVELENGTHS	93
Zacharias N., Gaume R.: UCAC and URAT: optical astrometric catalog observing programs	95
Souchay J.: The large quasar astrometric catalogue (LQAC) and the densification of the ICRF through the LQRF (Large Quasar Reference Frame)	101
Bucciarelli B., Andrei A.H., Smart R.L., Lattanzi M.G., Schirosi U., Penna J.L., Dapra M., de Moura Estevao T.G., D’Avila V.A., Camargo J.I.B., Crosta M.T., Goldman B., Jones H.R.A., Nicastro L., Da Silva Neto D.N., Teixeira R.: Absolute parallaxes and proper motions from the PARSEC program	105
Bourda G., Collioud A., Charlot P., Porcas R., Garrington S.: Towards a VLBI catalog of optically-bright extragalactic radio sources for the alignment of the radio frame with the future GAIA frame	109
Damljanovic G.: Comparison of the proper motions in declination of four catalogues via 807 hipparcos stars	113
Fedorov P.N., Akhmetov V.S., Yatskiv Ya.S.: THE XPM catalogue as a realisation of the extragalactic reference system in optical and near infrared WAVELENGTHS	117
Maigurova N., Martynov M., Pinigin G.: Optical positions of ICRF sources using UCAC3 reference stars	121
Andrei A.H., Gontier A.-M., Barache C., da Silva Neto D.N. et al.: GAIA initial quasar catalogue - updates: morphology and variability	125
Yatskiv Ya.S., Bolotin S.L., Lytvyn S.O.: MAO C 08A combined catalogue of radio source positions created in the course of preparation for the ICRF2	127
SESSION 4: RECENT DEVELOPMENTS IN THEORY AND OBSERVATION OF EARTH ROTATION AND RELATED REFERENCE SYSTEMS	129
Brzezinski A.: Diurnal excitation of Earth rotation estimated from recent geophysical models	131
Gross R.S, Dickman S.R.: Observing and modeling long-period tidal variations in polar motion	137
Altamimi Z., Collilieux X.: Examination of some ITRF2008 results	143
Bohm S., Schuh H.: Response of the Earth system to zonal tidal forcing examined by VLBI based dUT1 variations	145
Chapanov Ya., Vondrak J., Ron C.: Centennial cycles of the solar activity and Earth rotation	149
Escapa A., Getino J., Miguel D., Ferrandiz J. M.: Influence of the inner core geopotential variations on the rotation of the Earth	153
Brumberg V. A., Ivanova T. V.: On solution of the three-axial Earth’s rotation problem	157
Boucher C.: A refined definition of the International Terrestrial Reference System	161
Coulot D., Bernard E., Collilieux X.: Influence of station referencing on the quality of EOP time series	163
Nastula J., Pasnicka M., Kolaczek B.: Comparison of the hydrological excitation functions HAM of polar motion for the period 1980.0-2007.0	164
Kosek W., Popinski W., Niedzielski T.: Wavelet based comparison of high frequency oscillations in the geodetic and fluid excitation functions of polar motion	168
Malkin Z.M.: Comparison of CPO and FCN empirical models	172
Nilsson T., Bohm J., Schuh H.: Impacts of the 2010 chile earthquake on Earth rotation	176
Schindelegger M., Bohm J., Schuh H., Salstein D.A.: High-resolution atmospheric angular momentum. Functions from different ecmwf data classes	180
Stamatakos N., Luzum B. , Stetzler B., Shumate N., Carter M. S.: Recent improvements in iers rapid service/prediction center products	184
Zotov L.V.: Analysis of Chandler wobble excitation, reconstructed from observations of the polar motion of the Earth	188
Aleshkina E.Yu.: on correlation between variations in Earth rotation and frequency of earthquakes	192
Abarca del Rio R. , Gambis D.: Revisiting a possible relationship between solar activity and Earth rotation variability	194
Bizouard C., Lambert S., Remus F., Seoane L., Gambis D.: The source of the variable Chandler wobble	196

Chapanov Ya. , Gambis D.: Variations of the Earth principal moments of inertia due to glacial cycles for the last 800KA	198
Hefty J., Gerhatova L., Burgan J.: Combination of GPS and GLONASS IN PPP algorithms and its effect on site coordinates determination	200
Kudryashova M., Lambert S., Dehant V., Bruyninx C., Defraigne P.: Determination of nutation offsets by combining VLBI/GPS-produced normal equations	202
Lambert S. B., Gontier A.-M., Barache C.: Operational and research activity at OPAR	204
Gontier A.-M., Lambert S. B.: Physical characteristics of the ICRF2 sources	206
Malkin Z.M. , Miller N.O.: Amplitude and phase variations of the chandler wobble from 164-yr polar motion series	208
Marčeta D., Šegan S.: Method for prediction of ΔT based on long-periodic terms in the Earth's rate of rotation	210
Marco F.J., Martinez M.J.: Applications of simultaneous ground-based and satellite observations	212
Martinez M.J., Marco F.J.: ΔT and tidal acceleration values from three european medieval eclipses	213
Morcov G.: About the configuration of the geoid undulations and their kinematics	215
Niedzielski T., Kosek W.: Nonlinear sea level variations in the equatorial Pacific due to ENSO	217
Richard J.Y., Gambis D., Bizouard C.: Earth rotation parameters determined over CONT08 from the combination of space geodetic techniques	219
Ron C., Vondrák J., Štefka V.: Comparison of the various atmospheric and oceanic angular momentum series	221
Štefka V.: The recent improvement in non-rigorous combination method of space geodetic techniques	223
Tian W., Brzezinski A., Soffel M.H., Gebauer A., Schreiber K.U., Klügel T.: The interpretation of high frequency signals in the g-ring laser gyroscope	225
Yao K., Capitaine, N.: Modelling of the Earth orientation and high precision astrometric observation techniques	227
SESSION 5: PULSARS TIMING, RELATIVITY AND TIME TRANSFER	229
Kopeikin S.M.: An extension of the IAU framework for reference systems	231
Hobbs G., Coles W., Manchester R., Chen D.: Developing a pulsar-based timescale	237
Rodin A.E.: Ensemble pulsar time scale	243
Cognard I., Desvignes G., Theureau G.: High precision pulsar timing: Nancay and the european pulsar timing array	247
Gusev A.: Chandler wobble and free core nutation of single pulsar	251
Soffel M.H., Klioner S.A., Gerlach E.: About the MacCullagh relations in relativity	255
Xie Y., Kopeikin S.: Post-Newtonian mechanics of the Earth-Moon system	258
Teyssandier P.: Post-post-Newtonian light propagation without integrating the geodesic equations	262
Mouret S.: Tests of fundamental physics with the GAIA mission	266
Lamine B., Courty J.-M., Reynaud S., Jaekel M.-T.: Testing gravity law in the solar system . .	270
Deng X.-M. , Huang T.-Y.: 2PN light propagation and measurement in the solar system	274
Dumin Yu.V.: Perturbation of a planetary orbit by the lambda-term (dark energy) in Einstein equations	276
Fienga A., Desvignes G., Cognard I., Theureau G.: Use of millisecond pulsars to test and link planetary ephemeride reference frames to ICRF	278
Kanj A., Achkar J.: Development of the TWSTFT carrier-phase technique at LNE-SYRTE . .	280
Bertone S., Le Poncin-Lafitte C., Lainey, V.: Light time calculations for deep space navigation	282
POSTFACE	284
