TABLE OF CONTENTS

PREFACE vi

LIST OF PARTICIPANTS vii

SCIENTIFIC PROGRAMME ix

LIST OF POSTERS xiii

SESSION 1: FUNDAMENTAL ASTRONOMY, TIME AND RELATIVITY 1

Titov, O.: The secular aberration drift and future challenges for VLBI astrometry 3

Bucciarelli, B., Andrei, A. H., Smart, R. L., Schirosi, U., Dapra, M., Lattanzi, M. G., Penna, J. L., da Silva Neto, D. N.: PARSEC's high precision astrometry - the making of 9

Coelho, B., Andrei, A., Antón, S., Taris, F., da Silva Neto, D., Souchay, J.: Morphological classification of QSOs in the SDSS DR7 population 13

Pitjeva, E. V.: Values of some astronomical parameters (AU, $GM_\odot$, $M_\odot$), their possible variations from modern observations, and interrelations between them 17

Hohenkerk, C. Y.: SOFA and the algorithms for transformations between time scales & between reference systems 21

Vondrák, J. Capitaine, N., Wallace, P. T.: New long-term expressions for precession 25

Capitaine, N.: Comparison between the variables and parameters used for high accuracy precession and nutation 29

Bize, S., Wolf, P.: Highly precise clocks to test fundamental physics 33

Soffel, M. H., Tian, W.: Relativity and large ringlaser gyroscopes 35

Lambert, S. B., le Poncin-Lafitte, C.: On general relativity tests with the VLBI 38

Soja, B., Plank, L., Schuh, H.: General relativistic delays in current and future VLBI 41

Capitaine, N., Folgueira, M.: Semi-analytical integration of precession-nutation based on the GCRS coordinates of the CIP unit vector 45

Lambert, S. B.: Status of the GLORIA geodetic VLBI analysis software package 47

Sekowski, M., Krynski, J.: Methods of use and presentation of the accurate astrometric data based on the modern terrestrial and celestial reference systems 49

SESSION 2: TOWARDS THE NEXT GENERATION OF SPACE-TIME REFERENCE SYSTEMS 51

Mignard, F.: From GAIA Frame to ICRF3 ? 53

Manchester, R. N., Hobbs, G.: Pulsar timing and a pulsar-based timescale 58

Yatskiv, Ya. S., Fedorov, P. N.: One possible realization of the ICRF before the GAIA frame . 64

Malkin, Z., Schuh, H., Ma, C., Lambert, S.: Interaction between celestial and terrestrial reference frames and some considerations for the next VLBI-based ICRF 66

Bourda, G., Charlot, P.: Plans for an accurate alignment of the VLBI frame and the future Gaia frame 70

Taris, F., Andrei, A., Klotz, A., Vachier, F., Côte, R., Souchay, J., Anton, S.: Optical monitoring of extragalactic sources for the link between the ICRF sources and the future Gaia extragalactic reference frame 74

Jacobs, C. S., Bach, U., Colomer, F., García-Miró, C., Gómez-González, J., Gulyaev, S., Horiuchi, S., Ichikawa, R., Kraus, A., Kronschnabl, G., López-Fernández, J. A., Lovell, J., Majid, W., Natusch, T., Neidhart, A., Philips, C., Porcas, R., Romero-Wolf, A., Saldana, L., Schreiber, U., Sotuela, I., Takeuchi, H., Trinh, J., Tzioumis, A., de Vicente, P., Zharov, V.: The Potential for a Ka-band (32 GHz) worldwide VLBI network 78

Pavlis, E. C., Kuzmicz-Cieslak, M., Hinkey, P. M.: Forthcoming improvements in SLR data analysis: Towards the mm-SLR 82

Romero-Wolf, A. F., Jacobs, C. S.: Effects of tropospheric spatio-temporal correlated noise on the analysis of space geodetic data 86

Jacobs, C. S., Clark, J. E., Garcia-Miro, C., Horiuchi, S., Sotuela, I.: X/Ka VLBI frame's role in multi-wavelength studies 90

Damljanovic, G., Milic, I.: CCD measurements in optical domain and astrometric positions of ICRF2 radio sources . . . 92
Lambert, S. B.: On the processing of VLBI intensive sessions . . . 94
Marco, F. J., Martinez, M. J.: Statistics and analytic compatibility to joint catalogues with a set of common ICRF defining sources . . . 96

SESSION 3: MODELLING, OBSERVATION AND PREDICTION OF EARTH ROTATION AND GLOBAL GEODYNAMICS 99

Böhm, S., Nilsson, T., Schindelegger, M., Schuh, H.: Atmospheric and oceanic excitation of Earth rotation . . . 101
Koot, L.: Constraints on the structure and dynamics of the Earth's deep interior inferred from nutation observations . . . 107
Seitz, F., Thomas, M.: Simulation, prediction and analysis of Earth rotation parameters with a dynamic Earth system model . . . 109
Dehant, V., Folgueira, M., Puica, M.: Analytical computation of the effects of the core-mantle boundary topography on tidal length-of-day variations . . . 113
Gross, R. S.: Improving UT1 predictions using short-term forecasts of atmospheric, oceanic, and hydrologic angular momentum . . . 117
Bizouard, C.: Asymmetric excitation of the polar motion . . . 121
Stamatakos, N., Luzum, B., Stetzler, B., Shumate, N., Carter, M. S., Tracey, J.: Recent improvements in the IERS Rapid Service Prediction Center products for 2010 and 2011 . . . 125
Kaufman, M. B., Pasynok, S. L.: Rapid EOP calculation using VieVS software . . . 129
Brzeziński, A., Böhm, S.: Analysis of the high frequency components of Earth rotation demodulated from VLBI data . . . 132
Chapanov, Ya., Vondrák, J., Ron, C.: A model of centennial oscillations of Earth rotation based on total solar irradiance variations . . . 136
Schindelegger, M., Böhm, J., Salstein, D. A., Schuh, H.: The signature of atmospheric tides in sub-daily variations of Earth rotation as unveiled by globally-gridded atmospheric angular momentum functions . . . 140
Kadow, C., Dobslaw, H., Matthes, K., Thomas, M.: Impact of atmospheric tides simulated in a chemistry-climate model on sub-diurnal variations in UT1 . . . 144
Panafidina, N., Kurdubov, S., Rothacher, M.: Empirical model of subdaily variations in the Earth rotation from GPS and its stability . . . 148
Nilsson, T., Böhm, J., Schuh, H.: Determination of Earth rotation by combining VLBI and ring laser observations . . . 152

Chapanov, Ya., Schuh, H., Nothnagel, A., Böhm, J.: Climatic and solar activity influences on interannual and decadal variations of VLBI stations . . . 156
Choliy, V. Ya., Zhaborovsky, V.: KG++: software for processing Satellite Laser Ranging observations . . . 158
Choliy, V. Ya: On the usage of XML file format in geodynamics . . . 160
Gambis, D., Salstein, D., Chapanov, Y.: Some systematic errors in AAM and OAM data . . . 162
Kolaczek, B., Pasnicka, M., Nastula, J.: Analysis of the geodetic residuals as differences between geodetic and sum of the atmospheric and ocean excitation of polar motion . . . 164
Krynski, J., Zanimonskiy, Y. M.: Geodynamic signals in time series of astrometric observations at Borowa Gora Observatory . . . 166
Malkin, Z. M.: On the impact of the galactic aberration on VLBI-derived precession model . . . 168
Malkin, Z. M., Tissen, V. M.: Accuracy assessment of the ERP prediction method based on analysis of 100-year ERP series . . . 170
Marčeta, D., Šegan, S., Glišović, N.: Detection of the mutual periodical changes in the Earth rate of rotation and the solar activity by singular spectrum analysis . . . 172
Martinez, M. J., Marco, F. J.: Non regular variations in the LOD from European medieval eclipses 174
Nagalski, T.: Comparison of polar motion excitation function derived from Equivalent Water Thickness data, obtained from filtered Stokes coefficients . . . 176
Nerge, P., Ludwig, T., Thomas, M., Jungclaus, J., Sündermann, J., Brosche, P.: Simulation of the tides of ancient oceans and the evolution of the Earth-Moon-system . . . 178
Yao, K., Capitaine, N., Lambert, S.: Nutation and high precision atrometry observation techniques 180

SESSION 4: CELESTIAL MECHANICS OF SOLAR SYSTEM BODIES 183
Escapa, A.: Analytical modeling of the rigid internal motions of a three-layer celestial body through Hamilton's Principle . . . 185
Hilton, J. L.: Progress report of the IAU Commission 4 Working Group on Ephemeris Access and the comparison of high accuracy planetary ephemerides . . . 191
Weratschnig, J.M., Stewart, S. G., Hilton, J. L.: New additions to the astronomical almanac: almanac data for dwarf planets . . . 197
Kudryavtsev, S. M.: Precise analytical calculation of the effect of solid Earth tides on satellite motion . . . 201
Pashkevich, V. V., Eroshkin, G. I.: Construction of the numerical and semi-analytical solutions of the Moon rotation . . . 205
Ivanova, T. V.: Taking into account the planetary perturbations in the Moon's theory . . . 209
Yagudina, E. I., Krasinsky, G. A., Prokhorenko, S. O.: EPM-ERA2011 Lunar theory and selenodynamical parameters from LLR (1970-2011) data . . . 213
Bazsó, A., Galiazzo, M.: Lunar effects on close encounters of Hungaria asteroids and near-Earth asteroids with the Earth . . . 217
Lhotka, C., Zhou, L. Y., Dvorak, R.: On the stability of Earth's Trojans . . . 221
Baudisch, H., Dvorak, R.: Where are the Saturn Trojans? . . . 225

Aljbaae, S., Souchay, J.: Effects of asteroids on the orbital motions of terrestrial planets . . . 229
Souami, D., Souchay, J.: The invariable plane of the solar system: A natural reference plane in the study of the dynamics of solar system bodies . . . 231
Tupikova, I.: Averaging in the N-body problem with the Lie-series method in standard osculating elements . . . 233

SESSION 5: SPACE OBSERVATIONS AND DEDICATED MISSIONS FOR GEODESY AND ASTRONOMY 235
Rummel, R., Gruber, T., Yi, W., Albertella, A. : GOCE: Its principles and science . . . 237
Hase, H., Behrend, D., Ma, C., Petrachenko, B., Schuh, H., Whitney, A.: The future global VLBI2010 network of the IVS . . . 243
Zharov, V. E., Girin, I. A., Kostenko, V. I., Likhachev, S. F.: Estimation of the ground-space interferometer parameters during Radioastron mission . . . 249
Pavlis, E. C., Ciufolini, I., Paolozzi, A.: LARES: A new ASI mission to improve the measurement of lense-thirring effect with Satellite Laser Ranging . . . 252
Lovell, J. E. J., McCallum, J. N., Shabala, S. S., Dickey, J. M., Watson, C. S., Titov, O. A., Tingay, S. J., Reynolds, C., Morgan, J. S.: The AuScope VLBI project . . . 256

DISCUSSION: ON FUTURE IAU RECOMMENDATIONS AND ORGANIZATION 261
McCarthy, D. D.: On future IAU recommendations and organization . . . 263
Capitaine, N.: Toward an IAU 2012 Resolution for the re-definition of the astronomical unit of length . . . 266
Urban, S. E., Kaplan, G. H.: Nomenclature for the current precession and nutation models . . . 270
Hilton, J. L.: Standardizing access to ephemerides . . . 272

POSTFACE 273
