

TABLE OF CONTENTS

PREFACE	vi
LIST OF PARTICIPANTS	vii
SCIENTIFIC PROGRAM	ix
LIST OF POSTERS	xii
SESSION 1: THEORETICAL ASPECTS OF REFERENCE SYSTEMS	1
Métivier L., Collilieux X., Altamimi Z., Lercier D.: The ITRF and its scientific applications	3
Zschocke S., Klioner S.A., Soffel M.: Towards sub-microarsecond models for relativistic astrometry	7
Alexandrov A.N., Fedorova E., Zhdanov V.I.: Optical coordinate system for a local observer in a weak gravitational field	12
Bertone S., Vecchiato A., Le Poncin-Lafitte C., Crosta M., Bianchi, L.: Latest advances in an astrometric model based on the Time Transfer Functions formalism	16
Girdiuk A. & Titov O.: Plan for VLBI observations of close approaches of Jupiter to compact extragalactic radio sources in 2014-2016	20
Teyssandier P. & Linet B.: Enhanced term of order G^3 in the light travel time: Discussion for some solar system experiments	24
Roland J.: Radio quasars and the link with Gaia	28
Liu J.-C., Xie Y., Zhu Z.: Aberration in proper motions for Galactic stars	32
Arminjon M.: On the definition of a reference frame and the associated space in a general spacetime	36
Hees A., Bertone S., Le Poncin-Lafitte C.: The Time Transfer Function as a tool to compute range, Doppler and astrometric observables	38
Khelifa S.: Noise characteristics in DORIS station positions time series derived from IGN-JPL, INASAN and CNES-CLS analysis centres	40
Kudryavtsev, S.M.: Corrections to tidal variations of the geopotential due to frequency depen- dence of Love numbers	42
Malkin Z.: On the Galactic aberration constant	44
Bizouard C. & OMIM Group: 2500 years of space-time reference systems	46
SESSION 2: THE NEXT ICRF - PROGRESS AND DEVELOPMENTS	49
Jacobs C. & ICRF-3 WG (invited): ICRF-3: Roadmap to the next generation ICRF	51
Mignard F.: Gaia status and early mission	57
de Witt A., Bertarini A., Horiuchi S., Jacobs C., Jung T., Lovell J., McCallum J., Quick J., Sohn B.W., Ojha R.: Extending the K-band celestial frame emphasizing Southern hemisphere .	61
Krasna H., Malkin Z., Böhm J.: Impact of seasonal station displacement models on radio source positions	65
Malkin Z.: On errors of radio source position catalogs	69
Zharov V., Voronko N.A., Shmeleva N.V.: Analysis of time series of the EOP and the ICRF source coordinates	73
Bachmann S., Thaller D., Engelhardt G.: Source positions from VLBI combined solution	77
Iddink A., Nothnagel A., Artz T.: Rigorous VLBI intra-technique combination strategy for upcoming CRF realizations	81
Andrei H., Antón S., Taris F., Bourda G., Souchay J., Bouquillon J., Barache C., Pereira Osorio J.J., Charlot P., Vieira Martins R., Lambert S., Camargo J.I., da Silva Neto D.N., Assafin M., le Campion J.-F.: The Gaia Initial Quasar Catalog	84
Souchay J., Andrei A., Barache C., Taris F., Bouquillon S., Gattano C.: The update of the Large Quasar Astrometric Catalog (LQAC)	88
Damljanovic G., Taris F., Boeva S., Latev G.: Optical data of ERS obtained at 60 cm ASV and 2m Rozhen telescopes useful for the link ICRF-Gaia CRF	91
Coelho B., Andrei A.H., Antón S.: The SDSS quasars as a testbench for the Gaia fundamental reference frame grid-points	95
Lambert S., Arias E.F., Souchay J.: VLBI realizations of the Celestial Reference Frame	97

Marco F.J., Martinez M.J., Lopez J.A.: An accurate and stable mixed method to obtain coefficients in VSH developments of residuals from ICRF2- Catalog differences	99
Marco F.J., Martinez M.J., Lopez J.A.: About homogeneity in combined catalogs	101
Martinez M.J., Marco F.J., Lopez J.A.: Problems caused by biased data in models of catalog adjustment	103
Raposo-Pulido V., Heinkelmann R., Nilsson T., Karbon M., Soja B., Tanir Kayikci E., Lu C., Mora-Diaz J., Schuh H., Gómez-González J.: Effects of the datum configuration of radio sources on EOP determined by VLBI	105
SESSION 3: ATOMIC AND PULSAR-BASED TIMESCALES - PROGRESS AND DEVELOPMENTS	107
Defraigne P.: Multi-GNSS time and frequency transfer	109
Hobbs G.: Development of a pulsar-based timescale	115
Petit G.: Atomic time scales and pulsars	120
Pottié P.-E., Lopez O., Kanj A., Rovera D., Achkar J., Chardonnet Ch., Amy-Klein A., Santarelli G.: Time and frequency comparisons with optical fiber links	124
Guo L., Li L., Zhao M.: Some astrometric discussions on pulsar parameters by timing and VLBI	128
Chupin B., Bize S., Guéra J., Laurent P., Rosenbusch P., Uhrich P., Abgrall M., Rovera G.: Realization of the new UTC(OP) based on the LNE-SYRTE atomic fountains	132
Meynadier F., Delva P., Le Poncin Lafitte C., Guerlin C., Laurent P., Wolf P.: ACES Micro-wave link data analysis: status update	134
SESSION 4a: EARTH ROTATION - THEORY	137
Ferrández J. & Gross R. (invited): The goal of the IAU/IAG Joint Working Group on the Theory of Earth rotation	139
Dehant V., Folgueira M., Puica M., Koot L., Van Hoolst T., Trinh A.: Next step in Earth interior modeling for nutation	144
Escapa A., Getino J., Ferrández J.M., Bañas T.: On the changes of IAU 2000 nutation theory stemming from IAU 2006 precession theory	148
Filippova A.S., Markov Yu.G., Rykhlova L.V.: Rotational-oscillatory motions of the deformable Earth in the short time intervals	152
Huang C.L., Liu C.J., Liu Y.: A generalized theory of the figure of the Earth: Application to the moment of inertia and global dynamical flattening	156
Pashkevich V.: Construction of the new high-precision Earth rotation series at a long time intervals	160
Ron, C., Vondrák, Chapanov Y.: Free core nutation - Possible causes of changes of its phase and amplitude	164
Zotov, L. & Bizouard, C.: Study of the prograde and retrograde Chandler excitation	168
SESSION 4b: EARTH ROTATION - MODELLING AND OBSERVATIONS	173
Thaller D. & Bachmann S.: The IERS Retreat: How to improve Earth Rotation products? . .	175
Bizouard C.: Comparison of geodetic and modeled excitation functions by Allan variance . .	181
Schinidegger M., Boehm J., Salstein D.: Analysis of atmosphere-excited intraseasonal polar motion via the torque approach	185
Brzeziński A., Rajner M.: Estimation of the Chandler wobble parameters by the use of the Kalman deconvolution filter	189
Chapanov Y., Vondrák J., Ron C., Pachalieva R.: Natural and systematic polar motion jumps	193
Ding H. & Shen W.-B.: Detection of the 531-day-period wobble from the polar motion time series	197
Capitaine N. & Yao K.: Nutation determination by means of GNSS - Comparison with VLBI .	200
Lambert S., Rosat S., Capitaine N., Souchay J.: The Earth's nutation: VLBI versus IAU 2000A	204
Nastula Y.: Gravimetric excitation function of polar motion from the GRACE RL05 solution .	208
Xu X., Zhou Y.H., Dong D.N.: EOP prediction improvement by weakening the edge effect . .	212
Yatskiv Y., Odynets P., Volvach O.: The "Simeiz-Katzively" co-location site of space geodesy techniques: current state and future activity	216

Hu H., Vondrák J., Su Y.J.: Anomalies of astronomical time-latitude residuals at YAO before Wenchuan earthquake	220
Richard J.Y., Lopes P., Barache C., Bizouard C., Gambis D.: Prediction of Universal Time using the artificial neural network	222
Malkin Z.: On detection of the free inner core nutation from VLBI data	224
Nagalski T.: Analysis of EWT maps from GRACE mission and land hydrology data	226
Bondarenko V.V., Filippova A.S., Markov Yu.G., Perepelkin V.: Amplitude-frequency analysis of the Earth orientation parameters and the variation of the second zonal harmonic of the geopotential	228
Skurikhina E., Ipatov A., Smolentsev S.G., Diyakov A.A., Schpilevsky V.V.: CONT11 - High-Frequency Earth Rotations Variations from VLBI Observations	230
Discussion on the topic of Earth's rotation	232
SESSION 5: SOLAR SYSTEM DYNAMICS - THEORY, MODELLING AND NUMERICAL STANDARDS	233
Rambaux N.: Rotational and librational motion of solar system bodies	235
Hees A., Folkner W., Jacobson R., Park R., Lamine B., Le Poncin-Lafitte C., Wolf P.: Tests of gravitation at Solar System scales beyond the PPN formalism	241
Pitjeva E., Kosmodamianskiy G., Pavlov D., Pitjev N., Poroshina A., Skripnichenko V.: Numerical ephemerides of planets and natural satellites of IAA RAS and their uses for scientific research	245
Fienga A., Verma, A.K., Laskar, J., Gastineau, G., Manche, H.: INPOP13a and its applications for testing gravity	249
Kudryavtsev S.: Approximation of orbital elements of telluric planets by compact analytical series	252
Yagudina E. & Vasiliev M.: EPM-ERA 2013 - The new version of lunar ephemeris developed in IAA RAS	255
Hestroffer D., Berthier J., Carry B., David P., Lainey V., Rambaux N., Thuillot W., Arlot J.-E., Bancelin D., Colas F., Desmars J., Devillepoix H., Fouchard M., Ivantsov A., Kovalenko I., Robert V.: Solar System dynamics with the Gaia mission	259
Hestroffer D., David P., Saillenfest M.: Local tests of General Relativity with solar system objects and the Gaia mission	263
Hilton J., Acton A., Arlot J.-E., Bell, S.A., Capitaine N., Fienga A., Folkner W.M., Gastineau M., Pavlov D., Pitjeva E.V., Skripnichenko V.I., Wallace P.T.: Report of the IAU Commission 4 Working Group on standardizing access to ephemerides and file format specification	265
Hohenkerk C.: SOFA - Authoritative tools & standard models	267
Ivanova T.V.: On Solution of the secular system in the analytical Moon's theory	269
Ivantsov A., Eggl S., Hestroffer D., Thuillot W.: On future opportunities to observe gravitational scattering of main belt asteroids into NEO source regions	271
Nelmes S., Hohenkerk C.: Comparisons of Ephemerides	273
Souami D., Lemaitre A., Souchay J.: On the spatial distribution of main belt asteroids	275
Thuillot W., Lainey V., Dehant V., Arlot J.-E., Gurvits, L., Hussmann H., Oberst J., Rosenblatt P., Marty J.C., Vermeersen B., Bauer S., De Cuyper J.-P., Dirkx D., Hestroffer D., Kudryashova M., Meunier L.E., Pasewaldt A., Rambaux N., Robert V., Tajeddine R., Willner K.: Recent activities of the FP7-ESPaCE consortium	277
Final Discussion	279
POSTFACE	281
