TABLE OF CONTENTS

PREFACE vi

LIST OF PARTICIPANTS vii

SCIENTIFIC PROGRAMME ix

SESSION 1: CELESTIAL REFERENCE SYSTEM AND FRAME 1

Malkin Z., Jacobs C., Arias F., Boboltz D., Böhm J., Bolotin S., Bourda G., Charlot P., de Witt A., Fey A., Gaume R., Gordon D., Heinkelmann R., Lambert S., Ma C., Nothnagel A., Seitz M., Skurikhina E., Souchay J., Titov O.: The ICRF-3: Status, plans, and progress on the next generation International Celestial Reference Frame 3

Raposo-Pulido V., Lambert S., Capitaine N., Nilsson T., Heinkelmann R., Schuh H.: On the systematics in apparent proper motions of radio sources observed by VLBI 9

Andrei A., Coelho B., Antón S.: Morphology of QSO host galaxies — a look at the SED 12

Damljanović G., Taris F., Boeva S.: Some preliminary photometric results of QSOs useful for the link between future Gaia CRF and ICRF 16

Iddink A., Jacobs C., Artz T., Nothnagel A.: First results of S/X and X/Ka-band catalogue combinations with full covariance information 20

Vityazev V., Tsvetkov A.: Comparison of astrometric catalogues UCAC4, XPM, PPMXL 24

Popadyov V., Tolchelnikova S.: Some common problems in geodesy and astrometry after establishment of ICRF 28

Ding P.-J., Liu J.-C., Zhu Z.: Galactic coordinate system based on multi-wavelength catalogues 32

Kurdubov S., Skurikhina E.: Core sources set selection 36

Lipovka A., Lipovka N.: On the problem of using of the ICRF radio coordinates reference system 38

Medvedev Y., Kuznetsov V.: Using positional observations of numbered minor planets for determination of star catalog errors 40

Taris F., Damljanović G., Andrei A., Klotz A., Vachier F.: Optical monitoring of QSO in the framework of the Gaia space mission 42

Vityazev V., Tsvetkov A.: Kinematics derived from northern and southern hemispheres of huge astrometric catalogues 44

SESSION 2: RELATIVITY AND TIME SCALES 47

Hees A., Bertone S., Le Poncin-Lafitte C., Teyssandier P.: Range, Doppler and astrometric observables computed from Time Transfer Functions: a survey 49

Klioner S.: High-accuracy timing for Gaia data from one-way time synchronization 55

Capitaine N., Soffel M.: On the definition and use of the ecliptic in modern astronomy 61

Tang K., Soffel M., Tao J.-H., Tang Z.-H.: Relativistic precession model of the Earth for a long time interval 65

Soffel M.H., Han W.-B.: Work related with IAU C52: RIFA 69

Litvinov D., Bartel N., Belousov K., Bietenholz M., Biriukov A., Fionov A., Gusev A., Kauts V., Kovalenko A., Kulagin V., Poraiko N., Rudenko V.: Gravitational redshift experiment with the space radio telescope RadioAstron 71

Titov O., Girdiuk A.: The deflection of light induced by the Sun's gravitational field and measured with geodetic VLBI 75

Le Poncin-Lafitte C., Delva P., Meynadier F., Guerlin C., Wolf P., Laurent P.: Time and frequency transfer with a microwave link in the ACES/PHARAO mission 79

Avramenko A.: Parametric invariance of the relativistic coordinate pulsar time scales 81

Heinkelmann R., Soja B., Schuh H.: Gravitational effects from a series of IVS R&D VLBI-sessions with observations close to the Sun 83

SESSION 3: SOLAR AND EXTRASOLAR SYSTEMS DYNAMICS 85

Shevchenko I.: Resonances in the Solar and exoplanetary systems (Abstract) 87

Devyatkin A., Gorshanov D., L'vov V., Tsekmeister S., Petrova S., Martyusheva A., Slesarenko V., Naumov K., Sokova I., Sokov E., Zinoviev S., Karashevich S., Ivanov A., Lyashenko A., Rusov S., Kouprianov V., Bashakova E., Melnikov A.: Investigation of asteroids in Pulkovo Observatory 88

Pitjeva E.: Evolution of ephemerides EPM of IAA RAS 92

Girdiuk A.: The improvement of the Pluto orbit using additional new data 96

Kudryashova M., Rosenblatt P., Marty J.-C.: Phobos mass estimations from MEX and Viking 1 data: influence of different noise sources and estimation strategies 100

Perminov A., Kuznetsov E.: Expansion of the Hamiltonian of a planetary system into the Poisson series in all orbital elements 104

Kuznetsov E., Zakharova P.: Long time dynamical evolution of highly elliptical satellites orbits 108

Vasilyev M., Yagudina E., Torre J.-M., Feraudy D.: Planned LLR station in Russia and its impact on the lunar ephemeris accuracy 112

Andrei A., Sigismondi C., Regoli V.: Measures of the Earth obliquity during the 1701 winter solstice at the Clementine meridian line in Rome 116

Hestroffer D., David P., Hees A., Le Poncin-Lafitte C.: Local tests of general relativity with Gaia and solar system objects 118

Kovalenko I., Hestroffer D., Doressoundiram A., Emelyanov N., Stoica R.: Statistical inversion method for binary asteroids orbit determination 120

Popova E.: Diagrams of stability of circumbinary planetary systems (Abstract) 122

Vavilov D., Medvedev Y.: Method of determining the small bodies orbits in the Solar system based on an exhaustive search of orbital planes 123

SUB-SESSION on the IAU/IAG Joint Working Group "Theory of Earth Rotation" 125

Ferrándiz J., Gross R.: Report on activities of the IAU/IAG Joint Working Group on Theory of Earth Rotation 127

Getino J., Escapa A.: Report on activities of the Sub-Working Group 1 "Precession/Nutation" of the IAU/IAG Joint Working Group on Theory of Earth Rotation. 131

Brzeziński A.: Report on activities of the Sub-Working Group 2 "Polar motion and UT1" of the IAU/IAG Joint Working Group on Theory of Earth Rotation 135

Heinkelmann R.: Report on activities of the Sub-Working Group 3 "Numerical solutions and validation" of the IAU/IAG Joint Working Group on Theory of Earth rotation 139

SESSION 4: EARTH'S ROTATION AND GEODYNAMICS 143

Schindelegger M., Böhm J., Salstein D.A.: The global S_1 tide and Earth's nutation 145

Dehant V. Folgueira M., Puica M., Van Hoolst T.: Refinements on precession, nutation, and wobble of the Earth 151

Liu J.-C., Capitaine N.: Possible improvements in the IAU 2006 precession based on recent progresses 155

Zharov V.: Towards new nutation theory 159

Bizouard C., Zotov L., Sidorenkov N.: Lunar influence on equatorial atmospheric angular momentum 163

Tercjak M., Böhm J., Brzeziński A., Gebauer A., Klügel T., Schreiber U., Schindelegger M.: Estimation of nutation rates from combination of ring laser and VLBI data 167

Brzeziński A., Wielgosz A., Böhm S.: On application of the complex demodulation for monitoring Earth rotation: Analysis of the nutation and long periodic UT1 data estimated by VieVS CD 171

Baenas T., Ferrándiz J., Escapa A., Getino J.: Effects of the tidal mass redistribution on the Earth rotation 175

Pashkevich V.: New high-precision Earth and Moon rotation series at long time intervals 179

Markov Y., Filippova A.: Numerical-analytical modeling of the Earth's pole oscillations 183

Nastula J., Wińska M., Biryło M.: Comparison of polar motion excitation functions computed from different sets of gravimetric coefficients 187

Ron C., Vondrák J.: Geomagnetic excitation of nutation 191
Sidorenkov N.: The Chandler wobble of the poles and its amplitude modulation 195
Zotov L., Bizouard C.: Prediction of the Chandler wobble 198
Pasynok S., Bezmenov I., Kaufman M.: Operative EOP activities in VNIIFTRI 202
Huang C., Zhang M.: Do we need various assumptions to get a good FCN? 206
Gorshkov V., Petrov S., Shcherbakova N., Smirnov S., Mohnatkin A., Trofimov D., Guseva T., Perederin V., Rosenberg N.: Deformation of the South-Eastern Baltic Shield from GNSS observations 211
Bezmenov I., Pasynok S.: GLONASS orbit/clock combination in VNIIFTRI 215
Bondarenko V., Perepelkin V.: Irregular phenomena in the Earth pole oscillation process and temporal variations of geopotential 217
Escapa A., Baenas T., Ferrándiz J., Getino J.: On the minimization properties of Tisserand systems 219
Gorshkov V.: Pole tide triggering of seismicity 221
Gross R., Nastula J.: Estimating the period and Q of the Chandler Wobble from observations and models of its excitation (Abstract) 223
Heinkelmann R., Belda-Palazón S., Ferrándiz J., Schuh H.: The consistency of the current conventional celestial and terrestrial reference frames and the conventional EOP series .. 224
Hu H., Malkin Z., Wang R.: Application of the Titius-Bode law in earthquakes study 226
Miller N.: Periodical regularities of polar motion in the Pulkovo latitude variations 228
Skurikhina E., Ipatov A., Smolentsev S., Kurdubov S., Gayazov I., Diyakov A., Olifirov V.: CONT14 — High-frequency Earth rotations variations from VLBI observations 230
Sun R., Shen W.-B.: Triaxial Earth's rotation: Chandler wobble, free core nutation and diurnal polar motion (Abstract) 232
Tsurkis I., Kuchay M., Spiridonov E., Sinyukhina S.: Probabilistic approach to describing the Chandler wobble: the role of the ocean 233
Tsyba E., Kaufman M.: Improvement of the software Bernese for SLR data processing in the Main Metrological Centre of the State Time and Frequency Service 235

SESSION 5: ASTRONOMICAL ALMANACS AND SOFTWARE 237

Bell S., Nelmes S., Prema P., Whittaker J.: The future of almanac services — an HMNAO perspective 239
Pavlov D., Skripnichenko V.: Rework of the ERA software system: ERA-8 243
Galushina T., Bykova L., Letner O., Baturin A.: The software IDA for investigation of asteroid dynamics and its use for study of some asteroid motion (Abstract) 247
Andrei A., Boscardin S., Penna J., Sigismondi C., Reis Neto E., d'Avila V.: Astrometry and numerical methods for the solar heliometer at Observatório Nacional in Brasil 248
Brattseva O., Gayazov I., Kurdubov S., Suvorkin V.: SINCom — the new program package for combined processing of space geodetic observations 250
Glebova N., Lukashova M., Netsvetaeva G., Sveshnikov M., Skripnichenko V.: Russian astronomical ephemeris editions and software 252
Hilton J., Acton C., Arlot J.-E., Bell S., Capitaine N., Fienga A., Folkner W., Gastineau M., Pavlov D., Pitjeva E., Skripnichenko V., Wallace P.: Report of the IAU Commission 4 Working Group on Standardizing Access to Ephemerides and File Format Specification: Update September 2014 254
Hohenkerk C.: SOFA & astrometry 256
Nelmes S., Whittaker J.: Almanac services for celestial navigation 258
Skripnichenko P., Galushina T., Loginova M.: EROS — automated software system for ephemeris calculation and estimation of probability domain (Abstract) 260
Suvorkin V., Kurdubov S., Gayazov I.: GNSS processing in Institute of Applied Astronomy RAS 261
